

SYNTHETIC - NON-CONFIDENTIAL - OFFLINE

A clean document for real app screenshots

This deterministic fixture gives Ream realistic text, tables, spacing, and mixed page layouts without exposing personal files.

Fixture checklist

- 1 Five pages with portrait and landscape orientations.
- 2 Headings, paragraphs, numbered steps, and compact callouts.
- 3 A ruled data table with numeric and status columns.
- 4 Stable sample content that can be regenerated byte-for-byte.

REFERENCE: REAM-QA-001

STATUS: READY FOR REVIEW

Purpose

Use a repeatable document when reviewing PDF reading, page organization, and PDF to Word reconstruction. Every sentence is intentionally generic and safe to display.

Review workflow

- 1 Open this fixture from Ream's PDF reader and confirm page controls remain visible.
- 2 Search for the phrase structured table and verify the correct page is found.
- 3 Open Organize, wait for all five thumbnails, then rotate one page and undo it.
- 4 Run PDF to Word and compare headings, paragraph spacing, table borders, and page orientation.

EXPECTED RESULT

The interface stays calm and readable while every action remains obvious, reversible, and reachable from persistent navigation.

Sample inventory table

A ruled table for checking row detection, wrapped cells, numeric alignment, and status labels.

Item	Category	Page	Cost	Status
Fixture cover	Document	1	\$0.00	Ready
Quality memo	Text	2	\$0.00	Ready
Inventory table	Table	3	\$0.00	Review
Two-column guide	Layout	4	\$0.00	Ready
Operations summary	Landscape	5	\$0.00	Review
Synthetic non-confidential screenshot archive	Privacy	0 files	\$0.00	Private

TABLE NOTE

All values are fictional. The zero cost and generic labels prevent accidental disclosure or misleading commercial claims.

Two-column extraction guide

Readable hierarchy

Clear headings, short paragraphs, and consistent spacing help readers scan before they commit to an action.

- 1 Start with the task outcome.
- 2 Keep the primary action visually dominant.
- 3 Place destructive actions away from routine controls.
- 4 Confirm completion with useful, specific feedback.

Extraction cues

This column intentionally uses different content so a converter must preserve reading order instead of merging lines across the gutter.

Typography

Bold section titles with regular explanatory text.

Spacing

Visible separation between ideas and controls.

Navigation

Five persistent destinations with stable labels.

Motion

Subtle transitions that respect reduced-motion settings.

Landscape operations summary

A wide page for mixed-orientation rendering and conversion checks.
